LASH LIFT

STEP BY STEP

The treatment time varies depending on the individual client's lashes. The larger pads offer a softer more natural curl where a small pad will provide a more dramatic curl.

- Remove any traces of makeup from eyelids and eye area using the *hairpearl* Eye Make-up Remover Foam and a clean cotton pad. *If desired, take a before photograph.*
- Choose the appropriate *hairpearl* Silicone Pads (S,M or L), trimming to fit as required.
- Ask your client to look upwards to place a *hairpearl* Aloe Eye Gel Patch under each eye ensuring clients bottom lashes are secured under them while the upper lashes rest on the silicone pad.

1 The adhesive *hairpearl* Aloe Eye Gel Patch is designed to protect the sensitive lower lid area during lash tinting and lifting treatments.

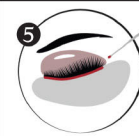

- Inform client that her/his eyes need to be closed from now on!
- Apply a few drops of *hairpearl* Lash Bond to the back of the *hairpearl* Silicone pads and place in position on the eyelids close to the root. Hold in place for 20 seconds until the pads adhere to the lids.

3 • Beginning at the outer corner of the eyelid apply lash bonder on the silicone pad in small sections and lift the lashes from the root by using the *hairpearl* Y-Brush ensuring not to cross the lashes. Gradually move along the pad until all lashes are bonded onto the silicone pad.

- 4 • Massage **Sachet #1** thoroughly and apply a small amount of this waving cream from root to the center of the lashes (to 1/3 up the lash) by using a *hairpearl* Microbrush. Please ensure NOT to soak the whole lash from root to the tip.

Processing time for sachet treatment

Fine or tinted lashes: 4-5 minutes
Natural healthy lashes: 5-6 minutes
Course healthy lashes: 6 minutes

- Remove waving lotion by using a new micro-brush or clean lash wipe applicator.
- Open **Sachet #2**, apply a small amount of the neutralizer again from root to the center of the lashes (where the waving lotion was applied) by using a new micro-brush.

Processing time for sachet treatment

Very fine, fine and tinted lashes: 5 minutes
Natural healthy and course healthy lashes: 6 minutes

- Remove neutralizer by using a lash wipe. Again, do not use any water or linty applicators.

Optional Color Boost. If desired, please tint the lashes at this point of treatment:

- Prepare chosen color of *hairpearl* tint and apply using the *hairpearl* tint brush with round tip.
- Remove the tint after 3-5 minutes using a clean cotton bud.

- After Removing tint color, gently wipe the lashes with damp 2x2 wipe while gently removing the lashes from the silicon pad.
- Remove the *hairpearl* Aloe Eye Gel Patches (if you haven't already done so). Apply **Sachet #3** using a mascara wand while coating both sides of the lashes. -*Take an after photograph.*
- Explain aftercare to client and give her/him a printed copy to take away along with the *hairpearl* Moisturizing Pen.

Important Aftercare

The aftercare advice is given to understand what should and should not be done 24-48 hours post treatment for longevity of the *hairpearl* Lash Lift treatment results.

- Keep lashes dry for 24-48 hours!
- Do not apply any make-up or receive any other eye treatment for least 24-48 hours after your treatment.
- Avoid rubbing the eyes.
- Avoid putting contact lenses back in for 24-48 hours.
- Avoid swimming/sauna/sweating for 24-48 hours.
- Use the *hairpearl* Moisturizing Pen daily.
- Comb the lashes (only) upwards using the *hairpearl* mascara wand.
- If any stinging or swelling occurs, keep applying a cold dampened cotton pad or cold compress. If it persists seek medical advice!

If the aftercare guidelines are followed with utmost care, the *hairpearl* Lash Lift treatment results can last 4-6 weeks.
